

# Furnace Maintenance Checklist

---

## Air Filter

---

- Change air filter every 1-2 months

## Burners & Flame Sensor

---

- Vacuum out debris around burners
- Inspect burners for cracks
- Clean debris out of transition channels (if applicable)
- Clean burner manifold orifices
- Scrub off build-up from flame sensor

## Heat Exchanger

---

- Visually inspect heat exchanger for cracks
- Perform match test (if needed)
- Test carbon monoxide (CO) detector every month

## Blower & Inducer Fans

---

- Check that fan wheel spins freely
- Inspect and replace fan belt (if needed)
- Oil fan motor

## Humidifier

---

- Clean or replace humidifier pad
- Adjust humidifier damper if changing seasons

## Electrical & Controls

---

- Inspect for loose wires and rusty terminals
- Clean/dust out electrical enclosure area

## Thermostat

---

- Test thermostat fan speeds (if applicable)
- Test & calibrate thermostat temperature
- Adjust thermostat schedule (if applicable)

## Ductwork

---

- Inspect ductwork for mold & mildew
- Inspect ductwork for air leaks
